

Geoff Bowland
Civil Engineer
LGE MIE Aust CPEng

Capabilities

Geoff is the most experienced consulting Engineer in Southeast NSW with over 40 years industry experience in Municipal, Civil, Structural and Environmental Engineering.

A feature of Geoff's experience is that he has a well rounded exposure to facets of Engineering;

1. Municipal Engineering and Planning in numerous councils (19 years),
2. Managing Director of his own major civil and structural contracting business (5 years)
3. Managing Director of a Engineering Consulting business (23 years)

Geoff has been involved in the entire spectrum of Engineering; feasibility, planning, design, construction and facility management in the fields of roads, bridges, solid and liquid waste, water supply, buildings, quarrying operations and environment and social assessments.

Member of the Institute of Engineers No. 28367
Local Government Engineer Certificate No. 1556
Chartered Professional Engineer
Town and Country Planning
Member Australian Standards Association

Design and Construction

As a result of Geoff's broad experience, he has an almost unique ability to design and construct:

- Cost effective solutions.
- Problem solving and finding technically suitable solutions.
- Designing structures and civil infrastructure that can be readily understood by contractors and easily built.

Project Management

Geoff understands contractors and their requirements. As such, he is able to:

- Manage small, medium and large projects
- Mediate disputes and establish amicable decisions
- Maintain works schedules and budgets to final completion.

Subdivisions and Integrated Developments

Geoff has a keen interest in challenging integrated projects, such subdivisions, including:

- Concept design and planning
- Detailed design, including supervision of team of designers.
- Development Approval and Construction Certificate documents preparation on behalf of the Client
- Review of Environmental factors, Archaeological and Environmental impact statements.
